

# ZOOMONTANA EDUCATION IS VIRTUAL!

WE ARE OFFERING A VARIETY OF DISTANCE LEARNING OPTIONS FOR TEACHERS & PARENTS THIS SCHOOL YEAR!

SPONSORED BY PHILLIPS 66.

# VIRTUAL FIELD TRIPS

Are you looking for a personalized zoological lesson? We offer hour-long LIVE virtual field trips on the topic of your choice with animal ambassadors for $50. We are able to do these for teachers and homeschool instruction alike! Some examples of virtual programs we've done have included dinosaur evolution, animal weaponry, and animal dentition!

# SKYPE IN THE CLASSROOM

With Skype in the Classroom, you and your students can take a LIVE virtual field trip to the zoo with our educators and meet three of our animal ambassadors while learning all about their animal adaptations. The best part? These 30 minute programs are free! Find us there at **https://education.skype.com/.** Our schedule will be released monthly.

# PRE-RECORDED VIDEOS

We also offer short (5-10 min) pre-recorded videos for you and your students if asynchronous learning is more your style. These videos are free! Just like our hour-long virtual field trips, these videos are personalizable! In the past we've done videos on the five different animal groups, as well as Q&A videos featuring student's questions about some of our animal ambassadors.

# ZOO TOURS

There will be no on-grounds zoo tours. However, if you and your students are interested in coming to the zoo, we will offer educational lesson plan packets for yourself and students to assist you in your self guided trip.
